Figure 3D · Correction categories

Measured class	Observed source barcode	Selected target barcode
Corrected off-list	Outside the full chemistry catalog	In the tool-selected set
Failure Mode 1	In the matched filtered reference	In both the matched filtered reference and tool-selected set
Failure Mode 2	In the chemistry catalog; outside the matched filtered reference	In the tool-selected set

Each category requires a changed barcode. A read–target pair can belong to more than one category.
